# HOW TO PREPARE FOR AN EXAM

This article was created by a professional writer and edited by experienced copy editors, both qualified members of the Demand Media Studios community.

- 1 Spend time practicing and studying as early and as much as you can. Setting aside a certain time each day, is best.
- 2 Force yourself to spend small increments of time studying every day for at least one week before the exam.
- 3 Take advantage of all pretest material your teacher makes available. They know what they are going to test you on and should be giving you information to use accordingly.
- 4 Attend any available review sessions even if you feel you don't really need it.
- 5 Plan your week before the exam to be sure you have plenty of time to study.
- 6 Ask your teacher to clear any uncertainties you have before the exam.
- 7 Sleep well the night before the exam and get a full eight hours.
- 8 Eat a good healthy breakfast the morning of your exam. This will help you wake up and get your brain moving.
- 9 Cram as much as possible the day of your exam to solidify any final ideas.
- 10 Do your best on the exam and do not put too much undue pressure on yourself to perform. You worked hard to get this far and can only do your best.

## LET US PRAY

Lord Jesus,

As I now prepare for my exams, I ask you to grant me strength of mind and constant hope. Banish from my mind all fear, anxiety, regret and nervous distraction. May your gift of the Holy Spirit guide and enlighten my fragile mind. At this difficult time, give me the gift of self-confidence and an assurance that you will hear my prayer, answer my need and continue to guide me as I pursue life's journey.

I ask this prayer through Christ Our Lord.

Amen.
